

REST API Response Codes

2xx – Success

Code	Meaning	Description
200	OK	Request succeeded. Common for GET, PUT, PATCH.
201	Created	Resource was created successfully. Common for POST.
202	Accepted	Request accepted for processing, but not completed yet.
204	No Content	Request succeeded, but response has no body. Common for DELETE.

3xx – Redirection

Code	Meaning	Description
301	Moved Permanently	Resource has permanently moved to a new URL.
302	Found	Resource temporarily available at another URL.
304	Not Modified	Cached version is still valid.

4xx – Client Errors

Code	Meaning	Description
400	Bad Request	Request is malformed or invalid.
401	Unauthorized	Authentication is missing or invalid.
403	Forbidden	Authenticated, but not allowed to access the resource.
404	Not Found	Resource does not exist.
405	Method Not Allowed	HTTP method is not supported for this resource.
409	Conflict	Request conflicts with the current resource state.
410	Gone	Resource used to exist but is no longer available.

Code	Meaning	Description
415	Unsupported Media Type	Request body format is not supported.
422	Unprocessable Entity	Request is syntactically valid but semantically invalid.
429	Too Many Requests	Rate limit exceeded.

5xx – Server Errors

Code	Meaning	Description
500	Internal Server Error	Generic server-side failure.
501	Not Implemented	Server does not support the requested functionality.
502	Bad Gateway	Gateway or proxy received an invalid response from an upstream server.
503	Service Unavailable	Server is temporarily unavailable or overloaded.
504	Gateway Timeout	Gateway or proxy timed out waiting for an upstream server.
